PROJECT

- ***Parental Control Web App***

Developed a robust parental control web app enabling guardians to monitor and manage their children's digital activities. Implemented features include setting usage limits, receiving activity reports, and enforcing healthy screen time boundaries.

Roles and Responsibilities

- Developed a dynamic web application using Java Spring Boot framework.
- Designed and implemented MySQL databases to store and manage application data efficiently.
- Collaborated with team members to troubleshoot issues and implement enhancements.
- Demonstrated strong problem-solving skills in resolving coding challenges and optimizing application performance.
